

Tools Walkthrough

Dev Day 2014 – Legato Tech Demo 2
Jen Chitty, Principle Engineer, CTO Group

So many on-target Linux tools!

Pre-Integrated:

- amix
- aplay
- arec
- ash
- awk
- dnsmasq
- hexdump
- iptables
- grep
- gdbserver
- gzip
- ltnng
- microcom
- python2.7
- scp
- ssh
- strace
- tc (netcat)
- top
- ping
- ps
- sed
- tar
- traceroute
- vi
- wget
- so many more...*

Mainline kernel, eglibc and gcc allows easy open-source integration.

App framework tools you've seen already

The tip of the iceberg seen in Tech Demo 1:

- inspect

Other Legato application framework tools

On Developer Host:

- legs
- configtargetssh
- instlegato
- mkapp
- mkexe
- instapp/rmapp/lisapp
- startlegato/stoplegato
- ifgen

On-Target:

- legato
- app
- config
- cm
